ASX & MEDIA RELEASE

CBD SOLAR PANEL SALES GAIN MOMENTUM

Diversified renewable energy company, CBD Energy, has recently taken sales orders in relation to 70 kW of solar equipment which is in addition to the 40 kW advised to the ASX on 21 July 2009.

These recent sales were made at the ATRAA (Appropriate Technology Retailers Association of Australia) 2009 conference which was held in Canberra over four days at the end of July.

This conference is Australia's largest solar industry event and was a showcase for the latest in renewable energy products and services.

The modules sold by CBD were rooftop solar panels with a bulk order taken by one Australian based distributor.

CBD is also discussing other possible sales as a result of initiatives from the conference.

The panels sold by CBD derive from the distribution arrangement with German solar energy company, Solon SE, which is a major shareholder in CBD.

CBD recently completed a \$5.4 million capital raising which enables progress with the Chatham Islands wind energy project, Shannons Flat regulatory approvals and the Emerald and Bowen energy services projects in Queensland.

CBD is also proceeding with documentation regarding potential co-development with GE Energy of the Shannons Flat wind farm project, located near Cooma and with an energy generation capacity of up to 50MW.

CBD is an integrated renewable energy company, combining engineering skills with technology that enables green based power, improved generation capacity, energy storage and remote area renewable energy power systems.
